EXPERIENCE

Move Forward, Dublin, Ireland —Senior Developer

June 2025 - September 2026

Multiple Software solutions, mainly for marketing implementations
APIs development and Integration
Database and cloud implementations and maintenance
Data Analysis and projections

Outer Rim, Dublin, Ireland — *Full Stack Developer*

July 2022 - April 2024

Full stack implementation and maintenance of the main application and its related tools and dependencies
APIs creation, communication and implementation
Database administration and optimization, locally and on cloud
App security implementation including JWT, library vulnerabilities, sanitization and server security
Cloud server administration and maintenance

IUA, Córdoba, Argentina — *Technical Assistant*

January 2021 - June 2022

Assistant for the mechanical-aeronautical department of IUA.
Participation in multiple investigations and hand-on projects
Mechanical parts design and development

EDUCATION

Instituto Universitario Aeronautico, Córdoba, Argentina — *Degree in Aeronautical Engineering*

Comprehensive engineering education focused on aircraft and mechanical design, aerodynamics, structural analysis, propulsion systems, and advanced computational calculation and simulations.
Strong foundation in applied mathematics, physics, and multidisciplinary engineering

SKILLS

Programming

Web development

Databases

Tools & Version Control

Systems & Automation

Engineering & Simulation

Engineering Fundamentals

CFD and Structural Simulations

ACHIEVEMENTS & CERTIFICATIONS

University Academic Performance of 8.00

Academic Excellence Award — Recognized for outstanding academic performance by Banco Roela, Córdoba, Argentina.

Academic Merit Scholarship — Awarded by the Government of Córdoba

English Proficiency C1 — validated by the Universidad de Lenguas de Córdoba, Argentina

Garcia Faure, Córdoba, Argentina — *Bachelor in social science and humanities*

PROJECTS

Finite Element Analysis (FEA) Software Development — *IUA development*

Designed and developed a highly optimized, modular Finite Element Analysis (FEA) software supporting multiple element types and flexible formulation of governing equations. Originally conceived as a university research project, the software remains in active development at the institution following the completion of the thesis.

Third Party API Integration — Outer Rim

Designed and implemented end-to-end integrations with Facebook and Google APIs, including both backend communication and frontend interfaces, within the company's core application. Developed internal tools for advertising campaign creation, management, and page administration through a unified interface.
